## ABOUT US

We introduce ourselves that we are, G-Care Council\*, a subsidiary unit of Gandhi Foundation, a federation of 425 NGOs comprising as members, presence across Tamil Nadu and Puducherry and working for the rural people on healthcare services with a mission “Health Education for All” and “Healthcare Services for All” for moral & spiritual regeneration of mankind, aligning our objective and goal with the United Nations, “Sustainable Development Goals”, focusing on “Good Health and Well-being”

We are into health care services and skill development training over a period of a decade and established our operations well within the contour of Tamil Nadu and Puducherry. We belong to health sector and render telemedicine services through G-Care Health KIOSK – an ATM, the most advanced Automated Health Testing and Monitoring Machine, facilitates the people with wide range of medical tests, consultation combined with doctor’s post-diagnosis, followed by doctor’s e-prescription made available instantly.

We have already forged an association with the Government of Puducherry and have been running successfully for the past 2 years. We have identified 121 Primary Health Centres in Puducherry Union Territory, out of which we have installed our KIOSK in 23 PHCs and Sub-Centres successfully and are fully operational through our Social Entrepreneurs, identified by our NGOs for the past 2 years. Please note that we have empanelled doctors in hundreds for consultation and established a Doctors’ Command Centre, enabling to get the expert doctors’ comment and opinion, made available for the patients, connected through our virtual platform, available through our KIOSKs. To highlight our services in this field, we have served more than 2.0 lakhs people of Puducherry Union Territory.

## Objective

The underprivileged people dwelling in rural areas should make use of the top medical facilities through virtual mode and get consultation from medical experts duly post-diagnosis

## Vision

To make our citizens, especially people dwelling in rural areas, free from ailments through integrating medical expertise and advanced technologies by creating a virtual platform to interface between medical experts and patients to avail a comprehensive service, post-diagnosis.

## Mission

Every human being living in remote villages should avail the facility on health care services and get benefitted through virtual link on par with the multi-specialty medical services available in cities.

## G-Care Council

We are G-Care Council\*, a subsidiary unit of Gandhi Foundation, a federation of 425 Non-Governmental Organisations (NGOs) with members from Tamil Nadu and Puducherry. "Sustainable Development Goals", focusing on "Good Health and Well-being.

We are working for rural people on healthcare services with a mission of "Health Education for All" and "Healthcare Services for All" for the moral and spiritual regeneration of mankind, aligning our objective and goal with the United Nations'

## How KIOSK Helps

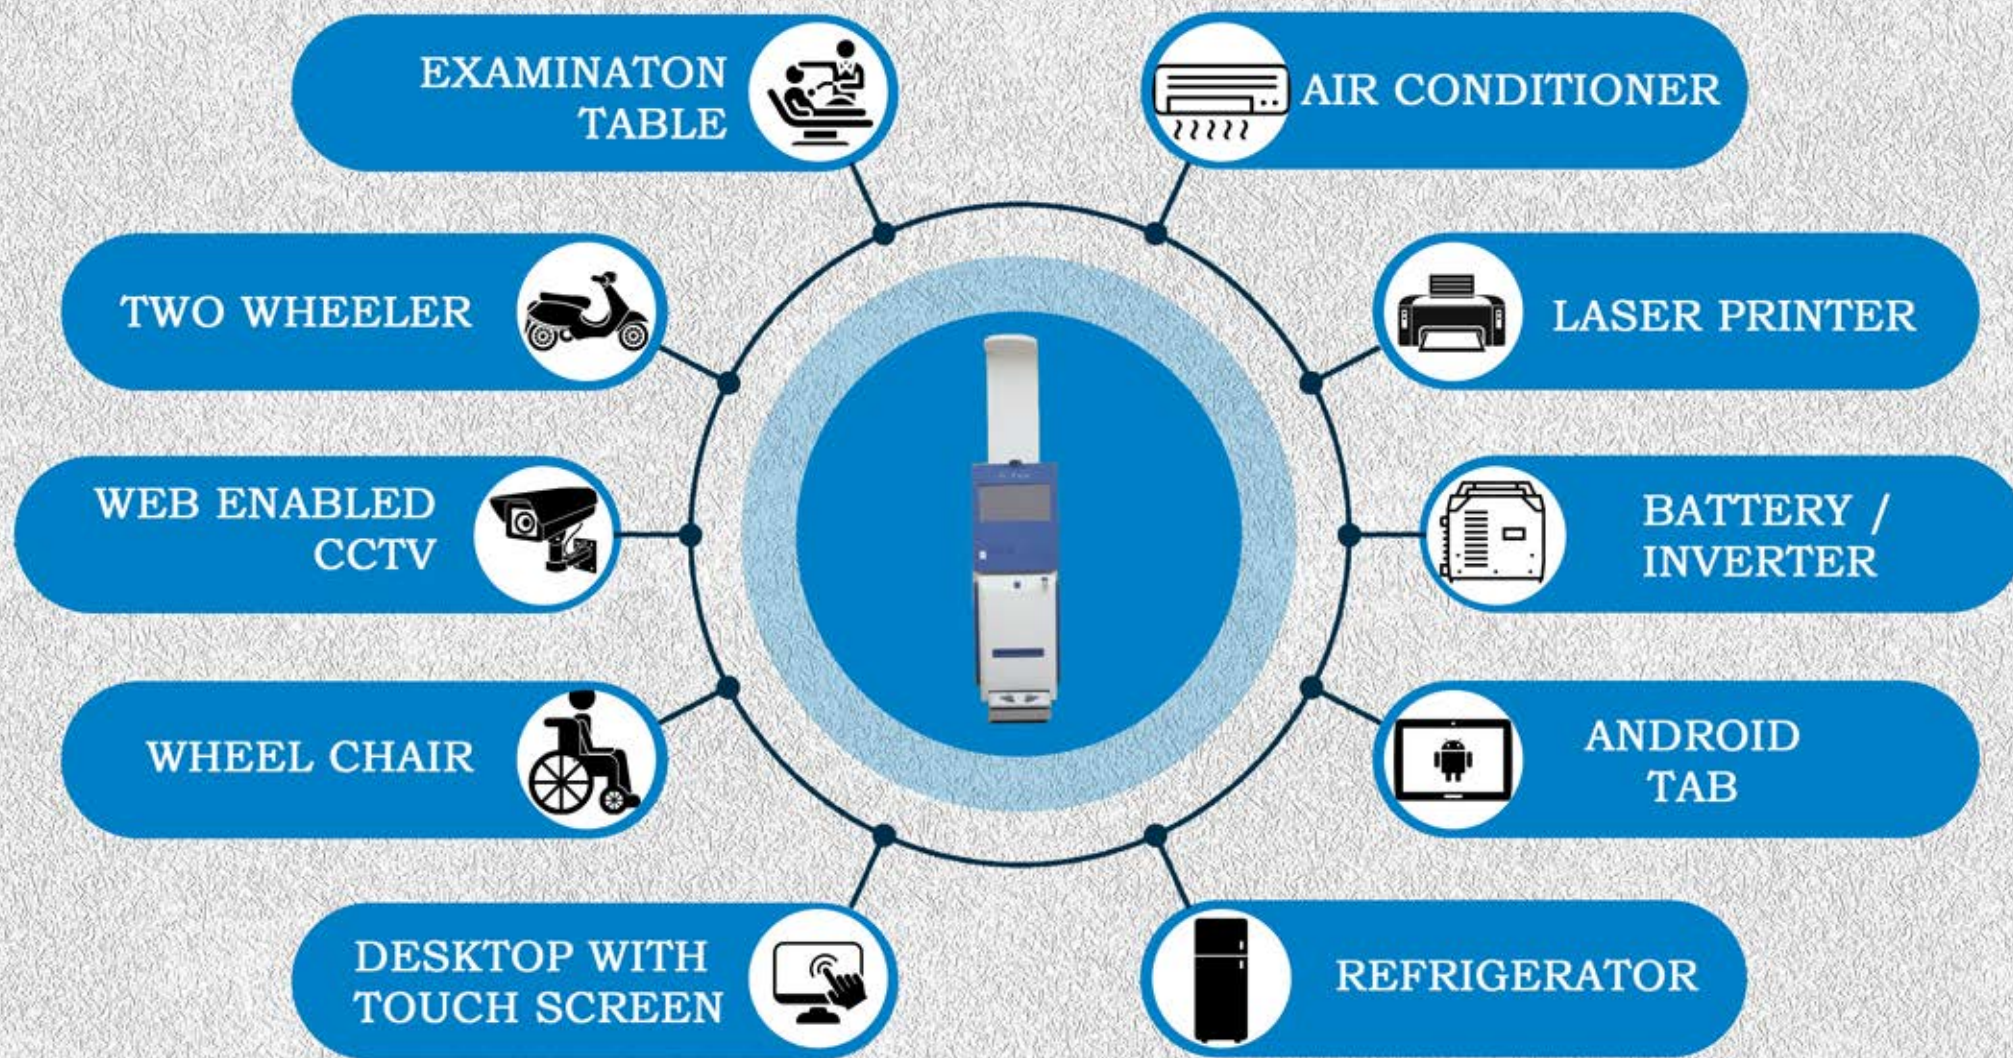

KIOSK- The Automated Health Testing & Monitoring Machine had its invention constructed on the notion of enabling the underprivileged rural community to have access to basic medical needs. When dwelling deeper on the term rural, the synonym is those people from the backward community for whom getting medical aid even for the simplest of ailments is being far-fetched. The Gandhi foundation had the mission of bringing the term “medical expertise” be known to the rural community & KIOSK became the means to achieve it.

So far, KIOSK has been installed around 23 locations in and around Puducherry. They have been installed in the Primary Health Care centers. Two of our trained staff are available near KIOSK at all times. They'll assist the patients in connecting with the doctors. However, the consultation stays confidential between the patient and the doctor alone. The prescription is delivered by the KIOSK machine itself. Any second or first-degree ailment is hinted to the patients and the team gives special attention to the patients directly!

With our excellent quality and useful services provided to patients in Puducherry for the past few years, our walk-ins have consistently increased in all PHCs.
